POSTURAL SEATING UNIT
can be positioned on:
• BASE for OUTDOOR use
• BASE for INDOOR use

size mini

MODULAR POSTURAL SYSTEM that can be positioned on INDOOR and OUTDOOR BASE

INTERNATIONAL **PATENTED** PATENT

CRASH TESTED

FEATURES

Postural SEAT easily reversible with SERVO-ASSISTED TILTING AND RECLINING SYSTEM

• **Tilting seating unit** operated by gas spring, **removable** thanks to a practical, safe, and foolproof attachment/detachment system, quickly reversible to face the parent (outdoor base), **equipped with a visual safety system**. The backrest is adjustable in height, the seat in depth and the width can be adjusted via multi-adjustable lateral supports. All the adjustments are precise and continuous.

• The upholstery of the seat is extremely breathable, comfortable, durable, easy to wash, and quick to dry, consisting of:

» **Non-removable supporting upholstery**: the texture with an essential design allows an **excellent breathability**, reducing sweating and bacterial growth. The fabric composition allows an **easy sanitization**. **It maintains performance even at high loads and is fire retardant** according to class 1 fire reaction (non-flammable combustible materials) according to Ministerial Decree June 26, 1984, and subsequent amendments.

» **The removable cover** is made of breathable and **highly innovative** material both internally and externally. The internal fabric is three-dimensional, lightweight, and provides high air circulation. It allows an **optimal weight distribution** and **great comfort**. The external fabric is also highly resistant to abrasion. Fireproof according to EN 1021-1:2014 and EN 1021-2:2014 standards. Washable at 40°C. Easily removable for washing with **quick drying times**.

• **Reclining backrest** with gas spring and height-adjustable precisely and continuously. The backrest has a **restraining shape** and, thanks to the resistant bearing upholstery and **aluminum bars**, provides a comfortable and breathable support.

• **Integrated headrest** in the backrest to ensure the child always has support when the seating unit is tilted and/or the backrest is reclined.

• **Includes the mod. 947 pelvic belt with variable angle.**

• **Wide and padded armrests**, adjustable in height, width, and inclination (they follow the adjustments of the pelvis lateral supports).

• Adjustable **pelvic supports** for containment in width, rotation, and depth independently.

• Height and angle-adjustable **leg rest** with physiological pivot, making the adjustment comfortable. Adjustable in depth along with the seat.

• **Adjustable single footrest with heel stops** or **adjustable separate footrests** (component mod. 957).

• **Lateral shoulder supports** mod. 967 provided as standard in the outdoor version.

OUTDOOR BASE (CRASH TESTED according to ISO 7176/19 and ANSI RESNA WC/19 standards) **parent-facing reversible.**

• Compact and lightweight **frame** with a new innovative design, easily maneuverable and foldable, with a tilt-adjustable handlebar. **It reduces depth space**.

• Solid, lightweight, and smooth-running **wheels** on all surfaces: 17 cm (6,7 In) front wheels with direction locks, 25 cm (9,8 In) rear wheels, with shock absorbers and independent drum and parking brakes.

HIGH LOW INDOOR BASE

• **Compact frame with height adjustment** - to allow approaching support and work surfaces - with gas spring adjustment while the child is seated. **The height adjustment system is internationally patented.**

• **Active tilt-in-space:** useful for positioning the child in an active position, to perform activities that stimulate straightening and activation of the posterior musculature.

• **Solid twin wheels** 7,5 cm (2,9 in), swiveling, **with rubber coating**. All equipped with parking brakes.

⚠ 📖 **Attention!**
Read carefully the user and maintenance manual

ADDITIONAL COMPONENTS for both BASES

☐ **863** Postural headrest adjustable in height, width, tilt and depth, with adjustable side supports. Size mini/S.

☐ **942** Ergonomic and mouldable **headrest** adjustable in height, tilt and forward-backward with adjustable sides. Size mini/S.
☐ **835** Padded shaped **headrest** adjustable in height.

☐ **852** Headrest with **parietal supports** adjustable in width. Size mini/S.

☐ **838** Trunk side **supports** adjustable in height width and transversally.

967 Shoulders lateral **supports.** Standard on outdoor base.
☐ Optional component for the indoor base

☐ **868** Wrappable and **flexible trunk supports** adjustable in height, width and transversally.

☐ **853** Vest harness

☐ **853H** Harness.

947 pelvic belt with **variable angle** as standard. Size mini.

☐ **834N** Padded **narrow abduction block.** Size mini/S.

☐ **834R** Adjustable **abduction block.** Size mini/S.

☐ **969** Postural pads kit.

☐ **824** Transparent **tray** adjustable in height, depth and tilt.

☐ **827** Foot straps for single footrest.

☐ **957** Legrest with separate **footrests.** Adjustable in height, inclination and abduction independently.

☐ **960** Heelrests only with legrest 957.

☐ **962** Footrests + Heelrests, only with legrest 957.

☐ **892** Padded **footplate covering,** for single footrest. Removable for washing. **NEW**

☐ **972** Padded **footrest height reducer** for single footrest. **NEW**

ADDITIONAL COMPONENTS for OUTDOOR BASE

☐ **819** Versatile canopy. **NEW**

☐ **825** Rain **cover.** Only with canopy 819.

☐ **839** Padded front **handle** Adjustable in height and tilt.

☐ **818** Padded **thermal cover.**

☐ **858** Shopping and vent tray basket.
☐ **935** Oxygen bottle **holder.**

☐ **891** Set of 4 tie down hooks for the forward-facing transport of the pushchair in a motor vehicle (cars, buses...)
